

Social SciSearch®

ONTAP® Social SciSearch® (File 207)

FILE DESCRIPTION

The **Social SciSearch®** database is an international, multidisciplinary index to the literature of the social, behavioral, and related sciences, produced by Thomson Scientific. Social SciSearch contains all of the records published in the *Social Sciences Citation Index*.

Social SciSearch offers some unique information retrieval techniques. In addition to the more conventional methods, Social SciSearch offers citation indexing, which permits searching by cited references. For records added since March 1991, author keywords and KeyWords Plus™ can also be searched.

ONTAP® Social SciSearch is available for **ON**line **T**rainin**A**nd **P**ractice. It contains more than 30,000 selected records from 1984 and 1985.

SUBJECT COVERAGE

- Anthropology, Archaeology, Area Studies
- Business, Finance, Economics, Statistics
- Communication
- Community Health
- Demography and Ethnic Group Studies
- Education Research
- Geography
- History
- Information/Library Science
- Law, Criminology and Penology
- Linguistics
- Management and Marketing
- Philosophy and Sociology
- Political Science and International Relations
- Psychology
- Urban Planning and Development

SOURCES

Social SciSearch indexes all significant items (articles, reports of meetings, letters, editorials, correction notices, etc.) from more than 1,500 of the most important worldwide social sciences journals. Additional articles relevant to the social sciences are selected from more than 2,400 journals in the natural, physical, and biomedical sciences.

/AB ABSTRACT: A holistic model of assessing cross-cultural experience is
developed employing both authentic assessment and quantitative methods.
Authentic assessment methods address the multi-faceted nature of
cross-cultural experience. In this case, portfolios are used, involving
the students in the assessment process. Within the context of portfolio
assessment, a quantitative instrument is presented, measuring the
degree of cross-cultural awareness by locating evidence of critical
thinking in student-generated text. The intention of the quantitative
instrument is to provide an index for the achievement of our
educational objective, cross-cultural awareness. This assessment is
carried out by multiple raters. Findings indicate that interrater
reliability is maintained, and results from a study with independent
raters suggest that the method can be easily acquired and conducted
reliably. (C) 2002 Elsevier Science Ltd. All rights reserved.
