

TRADEMARKSCAN® - Canada

FILE DESCRIPTION

The **TRADEMARKSCAN® - Canada** database, produced by Thomson CompuMark, provides information on all active trademarks, registrations, and applications filed with the Canadian Intellectual Property Office (CIPO). Pending applications include both actual and proposed use.

The database principally serves as a preliminary screening tool for checking the availability of new product or service names. As with other TRADEMARKSCAN databases, a search on the TRADEMARKSCAN - Canada database should not be used as the sole basis for clearing a new name or for filing an application in Canada. If a trademark is not found in the database, it does not necessarily mean that the trademark is available for use. Registration of a trademark confers the exclusive right to the use of the trademark throughout Canada and offers a greater degree of protection from infringement.

A typical record contains the trademark, international product/service classes assigned by Thomson CompuMark, current status, a description of the wares (goods) or services, application (serial) and/or registration number, owner name and address, representative and/or agent, date information, including Action History, and other pertinent information. Some fields such as Goods/Services are also translated from French into English. Trademark words can be searched as phrases (ET=), as whole words or word beginnings in the Basic Index, or as word fragments or word endings in the rotated index TR=. Marks consisting of corrupted spellings, unconventional presentations of words, non-Latin characters, or non-English-language words have been enhanced with cross references to facilitate retrieval.

Records for Design Only marks and those that have a design element, including block and stylized lettering, include images. Trademark designs and logos are referenced in appropriate fields, e.g., Design Type (DT=), Lining/Color Claims (PH=), and Design Phrase (PH=).

SUBJECT COVERAGE

TRADEMARKSCAN - Canada includes information on all active trademark registrations and applications filed for marks used or proposed to be used, on every type of product or service marketed commercially in Canada.

TIPS

USE TR=

to search word fragments; add @ to search word endings
SELECT TR=MAIL? OR TR=KEY@?

USE /DESIGN and FORMAT 19

to find and display trademark records and their images
SELECT word/DESIGN
TYPE S1/19/ALL

USE RANK

to determine which owners have the most registrations in a particular product area
SELECT IC=<code>; RANK OW

USE REPORT

to organize search results into tabular output
REPORT S1/ET,DR/ALL

DIALOG FILE DATA

Inclusive Dates: Active marks: 1865+
Inactive marks: 1979+
Abandoned Applications: 1980+
Update Frequency: Weekly
File Size: 917,000 records as of May 2005

CONTACT

⁴ In a REPORT which includes date fields, NA will appear when the requested date information is not available.

⁵ The Action History table displays a summary of CIPO actions and dates on which they were invoked. Actions may include changes in status, title, owner name or address.

⁶ Date through which official trademark applications are formalized. Use AP=9999 to establish DIALOG Alerts for continuous tracking of newly filed applications.

⁷ Assignee name appears within Footnotes.

⁸ Due to the nature of owner information recordation at CIPO, some records may not include all "owner types."

⁹ Named Company covers Last Reported Owner, Interested Party Owner, Assignee, and Agent/Rep. for Service. Owner History covers Last Reported Owner, Interested Party Owner, and Assignee. Interested Party Owner covers Pending Owner, Trustee, Opponent (Opposing Owner), Sec. 45 Requestor (Cancellation Owner), Old Owner, and Pending Seizure.

¹⁰ For country codes, use truncation to retrieve all occurrences of a particular country.

¹¹ A Geographic Indication refers to a wine or spirit which has characteristics that can be attributed to its geographic origin. These are protected under the Trade-Marks Act.

¹² English-language translation of official French-language Goods/Services description.

¹³ Added to record by Thomson CompuMark.

¹⁴ Index of trademark words and design elements. Use for secondary letter string queries and for design searches.

¹⁵ Does not display in record.

¹⁶ Miscellaneous Information includes Trademark As Supplied, Certification Text, Date Sent/Due, Date Opposition Filed, Date Opposition Resolved, Date Reg. Fee Request, Date Revived Reinstated, Declaration of Use Text, Doubtful Cases Text, Erratum Text, Exclusion Text, Expungement Cancellation Text, Full Text Translation, Geographic Indication (GI) Quality Statement, GI Territory Description, Other Canadian Registrations, Per Se Statement, Priority Text, Proposed Use Text, Readvertisement Comments, etc.

¹⁷ Not all records contain Design Phrase or Lining.

¹⁸ Named individuals may also be found with DM= and/or PH=.

¹⁹ Identifies Plant Variety as per the Plant Breeders' Rights Act.

²⁰ Use the @ character to indicate the end of a word, e.g., TR=MAIL@? when searching in the rotated index. Always use the question mark for the most comprehensive retrieval. Proximity operators (W) or (N) cannot be used with the TR= prefix. Use AND instead.

²¹ Field indicates total number of records added/amended during a particular update.
