 STORY TYPE: F WORD COUNT: 1121

 /TX Research into the development of new HIV drugs is continuing,
 buoyed by reports of adverse events with currently marketed agents
 and complex regimens which make it difficult for patients to
 adhere to their therapies.
 At the recent AIDS conference in Geneva, a number of companies
 reported updates on their anti-HIV compounds in clinical trials.

 Bayer Japan's sales down 28%
 Agrow 305 p5, May 29, 1998 (19980529)
 STORY TYPE: F WORD COUNT: 156

 Bayer Japan recorded agrochemical sales of Yen21,000
 million (\$174 million) in 1997, down 28% on 1996.
 Herbicide sales were most affected, down 67%, while
 insecticide and fungicide sales decreased by 21% and 17%,
 respectively. Herbicide sales were affected by lower
 plantings of rice, competition from the introduction of
 new products and new formulations, and distributors
 efforts to reduce existing pesticide stocks.
 Bayer Japan's agchem sales 1996-97 (Yen million)

Product category	1996(1)	% change	1997
Insecticides	14,000	-21.4	11,000
Fungicides	6,000	-16.7	5,000
Herbicides	9,000	-66.7	3,000
Garden/ professional Care	-	-	2,000
Total	29,000	-27.6	21,000

 (1) garden/professional care included in insecticides and
 fungicides sectors.
 Bayer Japan expects the rice fungicide, Win (carpropamid),
 to become its third most important product in its first year
 of sales (Agrow No 298, p 5). The fruit fungicide, fenhexamid
 (ISO proposed), is expected to be registered in Japan this year,
 while registration of the rice herbicide, fentrazamid (ISO
 proposed), is forecast for 1999.
