

BioCommerce Data's Biotechnology Directory

FILE DESCRIPTION

BioCommerce Data's Biotechnology Directory is a database concerned with the business aspects of biotechnology and the commercial applications of biological sciences worldwide. The organization profile records contain directory-style entries on organizations located throughout the world. File 286 currently contains two types of records, organization profile and abstract records. As of August 2004 File 286 will update with organization profile records only. The archive of abstracts will remain in the file, but no further abstract updates will be added. To reflect this change, the name of the database has changed to BioCommerce Data's Biotechnology Directory.

BioCommerce Data's Biotechnology Directory is ideal for competitor monitoring, business planning, investment analysis, identifying product licensing opportunities, science and policy studies, and monitoring legislation and case law in this field.

SUBJECT COVERAGE

TIPS

USE the /COMPANY Limit

to restrict retrieval to records that represent profiles of companies or other organizations.

USE BRITISH SPELLINGS

to accommodate differences:

S TUMOR OR TUMOUR

USE CN=

to find records for companies located in a certain country.

USE RANK CO CONT

to obtain a continuous list of companies involved in biotech areas.

DIALOG FILE DATA

Inclusive Dates: January 1981 to October 2005

Update Frequency: Closed

File Size:

Approximately 4,938 organization profile records and 190,375 abstract records
