

# Directory of Chemical Producers - Products

## FILE DESCRIPTION

**Directory of Chemical Producers - Products** produced by SRI Consulting, a division of Access Intelligence LLC, is a database of commercial chemical products and their international manufacturers. Data correspond to the products section of SRI Consulting's printed *Directory of Chemical Producers* (DCP) with the advantage of full multi-region searchability.

Published continuously since 1961, the DCP program is considered the preeminent source for timely and accurate coverage of the international chemical industry. DCP - Products in combination with DCP - Companies (File 364) contains the entire contents from the more than 6,500 pages published in the directories. The regional directories are each updated annually, based on data from comprehensive surveys sent to every producing company. Data are researched and analyzed by a team of professionals dedicated to maintaining the accuracy and timeliness of information in the DCP by constantly monitoring information through direct company contact as well as literature review. The program also benefits from information developed for other SRI Consulting marketing research studies.

## SUBJECT COVERAGE

**DCP - Products** provides an up-to-date producer listing of more than 21,000 products, representing virtually all commercial chemicals and polymers produced--with producers and plant locations for each, plant-by-plant nameplate capacity data for selected products, and extensive cross references for quick location of chemicals with alternate names. Many of the products are organized into functional or chemical groups to assist in surveying classes of related products.

The database currently consists of 9 regional directories covering more than 13,000 companies worldwide that operate more than 18,000 plants. More than 55 countries are included in the following regional designations: Canada, China, East Asia, Europe, India, Mexico, Middle East, South & Central

America, United States.

## TIPS

### USE FILE 363

to find basic manufacturers of a specific chemical or polymer. Plant-by-plant capacity data are included for some of the large volume products.

### USE MAP CO

to transfer company names to File 364 to view detailed information about the companies, their plants and products

S ACETONE/PN; MAP CO TEMP; B 364;  
EXS

### USE RANK

for statistical analysis of a data field such as country name to see in which countries a specific product is manufactured

S NA=ASPIRIN; RANK CN

### USE /CAP

to limit search results to records that contain capacity information.

### USE FORMAT 15

to display the full record with capacity data.

## DIALOG FILE DATA

Inclusive Dates: Current directories

Update Frequency: Quarterly reload.

File Size: 94,492 records as of Q2 2008

## CONTACT

**Directory of Chemical Producers - Products** is provided by SRI Consulting. Questions concerning file content should be directed to:

SEARCH OPTIONS

BASIC INDEX

SEARCH SUFFIX	DISPLAY CODE	FIELD NAME	INDEXING	SELECT EXAMPLES
—	—	All Basic Index Fields	Segment & Word	S STYRENE(W)ACRYLONITRILE S MIDLAND
/CA	CA	Capacity Notes <sup>1,2,3</sup>	Word	S TONS/CA S 32/CA
/CN	CN	Country Name <sup>1</sup>	Word	S INDIA/CN S UNITED(W)STATES/CN
/CO	CO	Company Name or Former Company Name <sup>1</sup>	Word	S NEW(W)COALTAR/CO
/GN	GN	Geographic Name <sup>1</sup>	Word	S INDIA/GN
/NA	NA	Product Name or Synonym <sup>1,5</sup>	Segment & Word	S SAN(W)RESIN?/NA S 2(W)AMINO(W)BENZENE/NA
/PG	PG	Primary Product Group <sup>1</sup>	Word	S PLASTICS/PG
/PL	TX	Plant Location	Word	S MIDLAND/PL
/PN	PN	Product Name <sup>1,5</sup>	Segment & Word	S STYRENE/PN S 5(W)ACETAMIDO(W)2(W)AMINO/PN
/SY	SY	Synonyms <sup>1,5</sup>	Segment & Word	S SAN/SY S N4(W)ACETYL(W)2(W)SULFO/SY
/TX	TX	Text <sup>4</sup>	Word	S MICHIGAN /TX S PHARMACEUTICAL?/TX

<sup>1</sup> Searchable in the Basic Index and in the Additional Indexes.

<sup>2</sup> Capacity data and notes occur in approximately 10% of records. Plant-by-plant capacity data for more than 50 petrochemicals and derivatives have been added. Most values are expressed in thousand metric tons.

<sup>3</sup> Display code CA is priced the same as Format 15.

<sup>4</sup> Text includes division name and address, plant location and address information.

<sup>5</sup> All chemical product names are indexed as complete individual words and chemically significant segments of words. Words such as GLUCOPYRANOSYL can be retrieved by either segment, e.g., S GLUCO or S PYRANOSYL. Any term in the Basic Index can be limited to a full term using /FW, e.g., S PYRANOSYL/FW; S ETHYLENE/NA,FW; S IMIDAZOLE/PN,FW. Locants, i.e., numbers indicating the position of a chemical group within the structure, are searched as words, e.g., S 2(W)3.

ADDITIONAL INDEXES

SEARCH PREFIX	DISPLAY CODE	FIELD NAME	INDEXING	SELECT EXAMPLES
—	AN	DIALOG Accession Number		
CA=	CA	Capacity (thousand metric tons) <sup>1,2,3,6</sup>	Numeric	S CA=32 S CA=>10
