Jane's Defence Weekly (JDW) January 20, 2010 v. 047 no. 004
Section Heading: AMERICAS, THE
By: Gareth Jennings

/TX

The US Army has begun operational missions of its General Atomics Aeronautical Systems Inc (GA-ASI) MQ-1C Sky Warrior unmanned aerial vehicle (UAV) in Iraq, it announced on 16 January.

This first aircraft - Quick Reaction Capability 1 (QRCL) - is attached to 1st Air Cavalry Brigade, 1st Cavalry Division, US Division - Center and has been undergoing flight testing in theatre for some months.

The army wanted QRCL to be assigned to the Baghdad area of operations and, since the 1st Cavalry Division was in charge of operations for Baghdad at the time, the aircraft was placed under the auspices of the 1st Air Cavalry Brigade.

(portion of record omitted)

The extended-range/multi-purpose (ER/MP) Sky Warrior, which is a larger variant of the Predator UAV, is operated by soldiers in Iraq using the One System ground control station (GCS) as opposed to being flown remotely from the United States.
