

TRADEMARKSCAN[®] - South Korea**FILE DESCRIPTION**

The **TRADEMARKSCAN[®] - South Korea** database is produced by Thomson CompuMark. The database principally serves as a preliminary trademark screening tool for checking on the availability of new product and service names. Like the other **TRADEMARKSCAN** files, **TRADEMARKSCAN - South Korea** should not be used as the sole basis for clearing a new name or for filing a trademark application. If a trademark is not found in the database, it does not necessarily mean that the trademark is available for use. Registration does, however, confer the exclusive right to the use of a trademark and offers a greater degree of protection from infringement.

Most of the records contain the trademark, application and registration numbers, international and national class(es), status, goods/services description in English, current owner, dates, and other pertinent information. Trademarks can be searched as phrases (ET=), as whole words or word beginnings in the Basic Index, or as word fragments or word endings in the rotated index (TR=). All trademarks have a corresponding image. Korean trademarks are transliterated, and the original graphic filing is provided in the image.

The **TRADEMARKSCAN - South Korea** database can be searched individually or in conjunction with other trademark file(s). Special efforts have been made to standardize the search and display fields for all trademark databases. The OneSearch category, TMKS, covers all trademark databases. The ASIATMKS category cover Australian, Japanese and South Korean trademarks.

SOURCES

TRADEMARKSCAN - South Korea contains information on unpublished and published applications and registrations from KIPO (Korean Intellectual Property Office). Active and Inactive marks from 1954 forward are included.

TIPS**BEGIN 655**

to screen potential trademark, product or service names in South Korea.

B 655

USE TR=

to search word fragments; add @ to search word endings

SELECT TR=MAIL? OR TR=KEY@?

USE RT=IMAGE and FORMAT 19

to find and display trademark designs

SELECT word/DESIGN and RT=IMAGE

TYPE S1/19/ALL

USE RANK

to see which owners have the most registrations in a particular classification.

SELECT IC=<code>; RANK OW

USE REPORT

in a single-file search to organize search results into tabular output

REPORT S1/TX,ON/ALL

DIALOG FILE DATA

Inclusive Dates: 1954+

Update Frequency: Weekly

File Size: 950,000 records as of September 2006

Getting Information on Trademark File Currency

The command TYPE 9999999/23 can be used in any TRADEMARKSCAN database to retrieve currentness data pertaining to trademark application filings and registrations. The type and amount of information provided varies by database. The following example is from the TRADEMARKSCAN - South Korea database.

? TYPE 9999999/23

9999999/23

DIALOG(R)File 655:TRADEMARKSCAN(R)-South Korea
 (c) 2006 Thomson CompuMark. All rts. reserv.

File updated to include application no. 4020050034267 as per July 21, 2005

SEARCH OPTIONS

BASIC INDEX

SEARCH SUFFIX	DISPLAY CODE	REPORT (FIELD LENGTH)	FIELD NAME	INDEXING	SELECT EXAMPLES
—	TX	TX (32)	Trademark Text & Enhancements ^{1,2}	Word	Whole Word: S KEY Start of Word: S KEY?

¹ Use the Basic Index to search complete words, compound words, or word beginnings, e.g., S KEY?. Use the rotated index TR= to search word fragments, or word endings, e.g., TR=MAIL?. Since punctuation is stripped for trademark searching, use the AND operator instead of the (W) operator for the most comprehensive retrieval. Search compound words as the whole word and as its parts, e.g., S KEYMAIL? OR (KEY AND MAIL?).

² Since trademarks are not cross-referenced, for the most comprehensive retrieval, alternative spellings should be SELECTed either in the Basic Index, e.g., SELECT HARBOR OR HARBOUR OR HAVRE or in the Rotated Trademark index, e.g., SELECT TR=(HARBOR? OR HARBOUR? OR HAVRE?).

ADDITIONAL INDEXES

SEARCH PREFIX	DISPLAY CODE	REPORT (FIELD LENGTH)	FIELD NAME	INDEXING	SELECT EXAMPLES
—	AZ	—	DIALOG Accession Number		
CN=	CN	—	Country of Owner	Phrase	S CN=SOUTH KOREA S CN=KR

YX=	YX	YX (11)	Year Will Expire ³	Phrase	S YX=2003

³ In a REPORT which includes date fields, NA will appear when the requested date information is not available. Trademark and owner names longer than 32 characters are truncated in REPORT displays.

⁴ Named Company includes Owner (ON and OW), and Agent (when present).

⁵ Goods & Services descriptions are provided in English only.

⁶ Miscellaneous Information includes Date of Last Full Publication, Database Identifier, Design Extra, Duration, and Notes.

⁷ All records have images. Since text is transliterated, the image will contain the original Korean graphical representation of the (Stack #365) with any designs.

File 655 TRADEMARKSCAN® - South Korea

⁸ In the rotated index, use the @ character to indicate the end of a word, e.g., TR=MAIL@?. Use the question mark for the most comprehensive retrieval. Use AND instead of proximity operators (W) or (N) the TR= prefix.

⁹ International Classes apply as of March 1, 1998, but all marks have harmonized International Classes derived from National Classes.

¹⁰ Does not display in record.

¹¹ Images can be displayed when searches are conducted on the Internet using Dialog Web, DialogClassic, or DialogLink Version 5.0 or higher.

SPECIAL FEATURES

For command descriptions, enter HELP LIMIT, HELP SORT, HELP RANK online.

LIMIT	/ACTIVE -- Active Applications and Registrations /DESIGN -- Design Type ⁷ /INACTIVE -- Abandoned, Cancelled, and Expired Records /NODESIGN -- Word Only	S S1/ACTIVE S S5/DESIGN S S3/INACTIVE S S7/NODESIGN
SORT	CO, DF, DR, DX, IC, ON, OW, RN, SN, TX	SORT S1/ALL/TX PRINT S5/5/1-24/ON
RANK	All phrase- and numeric-indexed fields in the Additional Indexes can be ranked. Other RANK codes include: CO, DF, DR, DX, ET, IC, IN, LR, NC, NN, ON, OW, RN, SN, ST, YF, YR	RANK ON

PREDEFINED FORMAT OPTIONS
