

TRADEMARKSCAN[®] - Australia**FILE DESCRIPTION**

The **TRADEMARKSCAN[®] - Australia** is produced by Thomson CompuMark. The database principally serves as a preliminary trademark screening tool for checking on the availability of new product and service names. Like the other TRADEMARKSCAN files, **TRADEMARKSCAN - Australia** should not be used as the sole basis for clearing a new name or for filing a trademark application. If a trademark is not found in the database, it does not necessarily mean that the trademark is available for use. Registration does, however, confer the exclusive right to the use of a trademark and offers a greater degree of protection from infringement.

Records generally contain the trademark, application and registration numbers and dates, international class(es), status, goods/services description, current owner, opposition, and other pertinent information. Trademarks can be searched as phrases (ET=), as whole words or word beginnings in the Basic Index, or as word fragments or word endings in the rotated index (TR=). Trademark designs and logos are referenced in appropriate fields, e.g., Design Type (DT=), Lining/Color Claims (PH=), Design Phrase (PH=), and Disclaimer (DM=). Records for marks that contain a design, include the trademark image.

The **TRADEMARKSCAN - Australia** file can be searched individually or in conjunction with other trademark file(s). Special efforts have been made to standardize search and display fields for all trademark databases. The OneSearch category, TMKS, covers all trademark databases. The ASIATMKS category covers Australian, Japanese and South Korean trademarks.

SOURCES

TRADEMARKSCAN - Australia includes unpublished applications and published registrations filed with IP Australia. Invalid trademarks are retained for three years.

TIPS**BEGIN 656**

to screen potential trademark, product or service names used in Australia.

B 656

BEGIN ASIATMKS

to screen potential trademark, product or service names across all files in the ASIA-PACIFIC region.

USE TR=

to search word fragments; add @ to search word endings
SELECT TR=MAIL? OR TR=KEY@?

USE RT=IMAGE and FORMAT 19

to find and display trademark records and their images
SELECT word/DESIGN AND RT=IMAGE
TYPE S1/19/ALL

USE RANK

to find owners with the most registrations in a particular classification.

SELECT IC=<code>; RANK OW

USE REPORT

in a single-file search to organize search results into tabular output

REPORT S1/TX,ON/ALL

DIALOG FILE DATA

Inclusive Dates: 1906+

SEARCH OPTIONS

BASIC INDEX

SEARCH SUFFIX	DISPLAY CODE	REPORT (FIELD LENGTH)	FIELD NAME	INDEXING	SELECT EXAMPLES
—	TX	—	Trademark Text & Enhancements ^{1,2}	Word	Whole Word: S KEY Start of Word: S KEY?

¹ Use the Basic Index to search complete words, compound words, or word beginnings, e.g., S KEY?. Use the rotated index TR= to search word fragments, or word endings, e.g., TR=MAIL?. Since punctuation is stripped for trademark searching, use the AND operator instead of the (W) operator for the most comprehensive retrieval. Search compound words as the whole word and as its parts, e.g., S KEYMAIL? OR (KEY AND MAIL?).

² Since trademarks are not cross-referenced, for the most comprehensive retrieval, alternative spellings should be SELECTed either in the Basic Index, e.g., SELECT HARBOR OR HARBOUR OR HAVRE or in the Rotated Trademark index, e.g., SELECT TR=(HARBOR? OR HARBOUR? OR HAVRE?).

ADDITIONAL INDEXES

SEARCH PREFIX	DISPLAY CODE	REPORT (FIELD LENGTH)	FIELD NAME	INDEXING	SELECT EXAMPLES

ADDITIONAL INDEXES (cont'd)

SEARCH PREFIX	DISPLAY CODE	REPORT (FIELD LENGTH)	FIELD NAME	INDEXING	SELECT EXAMPLES
YF=	YF	YF (7)	Year Filed ³	Phrase	S YF=2006
YR=	YR	YR (12)	Year Registered ³	Phrase	S YR=1993
YX=	YX	YX (11)	Year Will Expire ³	Phrase	S YX=2010

³ In a REPORT which includes date fields, NA will appear when the requested date information is not available. Trademark and owner names longer than 32 characters are truncated in REPORT displays.

⁴ Named Company includes Owner (ON= and OW=), Opponent (OP=), Correspondent (LR=), and Registered User (RU=) when present.

⁵ Miscellaneous Information includes Database Identifier, Date Withdrawn, Design Extra, Duration, and Date Last Publication..

⁶ RT=IMAGE can be used to locate records with displayable images.

⁷ In the rotated index, use the @ character to indicate the end of a word, e.g., TR=MAIL@?. Use the question mark for the most comprehensive retrieval. Use AND instead of proximity operators (W) or (N) the TR= prefix.

⁸ Does not display in record.
