

TRADEMARKSCAN® - Czech Republic

FILE DESCRIPTION

The **TRADEMARKSCAN® - Czech Republic (File 680)** database is produced by Thomson CompuMark. The database principally serves as a preliminary trademark screening tool for checking on the availability of new product and service names.

Like other TRADEMARKSCAN files, TRADEMARKSCAN - Czech Republic should not be used as the sole basis for clearing a new name or for filing a trademark application. If a trademark is not found in the databases, it does not necessarily mean that the trademark is available for use. Registration does, however, confer the exclusive right to the use of a trademark and offers a greater degree of protection from infringement.

TRADEMARKSCAN - Czech Republic features full records that contain the trademark, application and registration numbers, international class(es), status, goods/services, current owner, dates, and other pertinent information. Trademarks can be searched as phrases (ET=), as whole words or word beginnings in the Basic Index, or as word fragments or word endings in the rotated index (TR=). Trademark design/logo images can be located by restricting a search with RT=IMAGE. Color images are provided when available. Other information about the mark such as e.g., Design Type (DT=), Lining/Color Claims (PH=), Translated Mark (XT=), and Design Codes (VC=) are also included.

TRADEMARKSCAN - Czech Republic can be searched individually or in conjunction with other trademark file(s). Search and display fields have been standardized as much as possible for use in cross-file searching. The OneSearch category, TMKS, covers all trademark databases. The EUROTMS category covers the International Register, Community Trademarks, and the European, Scandinavian, and Central European trademark databases.

SOURCES

TRADEMARKSCAN® - Czech Republic (File 680) contains information about trademark applications and registrations filed with the Czech Patent Office since 1859. Active records include published and unpublished applications and published registrations still in force. Inactive published and unpublished trademarks from the last 5 years are also included.

TIPS

BEGIN 680

to screen potential trademark, product or service names filed in the Czech Republic.

BEGIN EUROTMS

to screen potential trademark, product or service names filed across all European trademark files

USE TR=

to search word fragments; add @ to search word endings
SELECT TR=MAIL? OR TR=KEY@?

USE RT=IMAGE and FORMAT 19

to find and display trademark records and their images
SELECT word AND RT=IMAGE; TYPE S1/19/ALL

USE RANK

to see which owners have the most registrations in a particular area.
SELECT IC=<code>; RANK OW

USE REPORT

in a single-file search to organize search results into tabular output
REPORT S1/TX,ON/ALL

DIALOG FILE DATA

Inclusive Dates: 1859+
Update Frequency: Monthly
File Size: 189,414 records as of June 2009

File updated to include application no 466516 as per April 16, 2009.

SEARCH OPTIONS

BASIC INDEX

SEARCH SUFFIX	DISPLAY CODE	REPORT (FIELD LENGTH)	FIELD NAME	INDEXING	SELECT EXAMPLES
—	TX	—	Trademark Text & Enhancements ^{1,2}	Word	Whole Word: S KEY Start of Word: S KEY?

¹ Use the Basic Index to search complete words, compound words, or word beginnings, e.g., S KEY?. Use the rotated index TR= to search word fragments, or word endings, e.g., TR=MAIL?. Since punctuation is stripped for trademark searching, use the AND operator instead of the (W) operator for the most comprehensive retrieval. Search compound words as the whole word and as its parts, e.g., S KEYMAIL? OR (KEY AND MAIL?).

² Since trademarks are not cross-referenced, for the most comprehensive retrieval, alternative spellings should be SELECTed either in the Basic Index, e.g., SELECT HARBOR OR HARBOUR OR HAVRE or in the Rotated Trademark index, e.g., SELECT TR=(HARBOR? OR HARBOUR? OR HAVRE?).

ADDITIONAL INDEXES

SEARCH PREFIX	DISPLAY CODE	REPORT (FIELD LENGTH)	FIELD NAME	INDEXING	SELECT EXAMPLES

YX=	YX	YR (12)	Year Expired ⁴	Phrase	S YX=2011

³ Named Company [CO=] includes Owner (ON and OW) and Agent/Correspondent (when present).

⁴ In a REPORT which includes date fields, NA will appear when the requested date information is not available. Trademark and owner names longer than 32 characters are truncated in REPORT displays.

⁵ Records containing trademark images can be located by including RT=IMAGE in the search. Images display in Formats 15 and 19 when searches are conducted using DialogLink 5, Dialog Classic on the Web, or DialogWeb. Depending on the trademark, images may be in color or black and white.

⁶ When searching word fragments in the Rotated Trademark index (TR=), use the @ character to indicate the end of a word, e.g., TR=MAIL@. To retrieve an embedded fragment, use the question mark, e.g., S TR=AIL?. Multiple TR= fragments can be combined with AND for the most comprehensive retrieval.

⁷ If unsure whether a number is a registration number (RN=) or an application number (SN=), search both fields, e.g., S RN,SN=123456.

⁸ The Phonetic Trademark provides English-like pronunciation of Czech words in the trademark name.

⁹ The Translated Mark provides an English equivalent of the mark. The translated words can be searched in the Basic Index and in the TR= Index.

¹⁰ Does not display in record.

SPECIAL FEATURES
