

(Myrtle Beach) The Sun News**FILE DESCRIPTION**

The Sun News, from South Carolina, covers one of America's popular resorts. The paper includes sections on world and national news, as well as on local news, sports, and coastal living. (The business section can be searched using SH=MONEY.) World and national coverage reflects the out-of-state visitor population. With tourism as the key industry, tourist trends across America are discussed, as well as amusement parks, water parks, nightlife, nature centers, and shopping. Enter B PAPERSSC to search (Columbia) *The State* (DIALOG File 720) and the *The Sun News* together.

TEXT:
 /LP, /TX A comet that is among the largest astronomers have ever seen is about to peak in brightness and size and is visible to the naked eye.

The Hale -Bopp comet, named for the two amateur astronomers who discovered it in July 1995, is an important celestial find that has the scientific community tracking its every movement.

/TX It's the comet of the century," said Mickey Prangley, meteorologist at WPDE-TV (Channel 15) in Myrtle Beach. "It's the most widely studied comet ever and will yield more data than any other comet. It's brighter than Jupiter."

Terry Richardson, professor of physics and astronomy at the College of Charleston, said this comet is significant for its size, brightness and the amount of time it will be able to be viewed from Earth.

"It's unusual for it to have been so far from the sun," he said. "It was past Jupiter when it was discovered. The nuclei, or head, is among the largest ever seen, and it's the brightest one anyone will get to see in their lifetime.

"There are more comets coming, but but we might not see them for decades. So many were disappointed by Halley, but this one was brighter than Halley when they were at the same distance."
